Introduction

In the competitive hospitality industry, data-driven insights are crucial for hotels to optimize their operations, enhance guest experiences, and drive business growth. This report presents a comprehensive analysis of a hotel reservation dataset, uncovering trends, patterns, and preferences of hotel guests.

Objectives

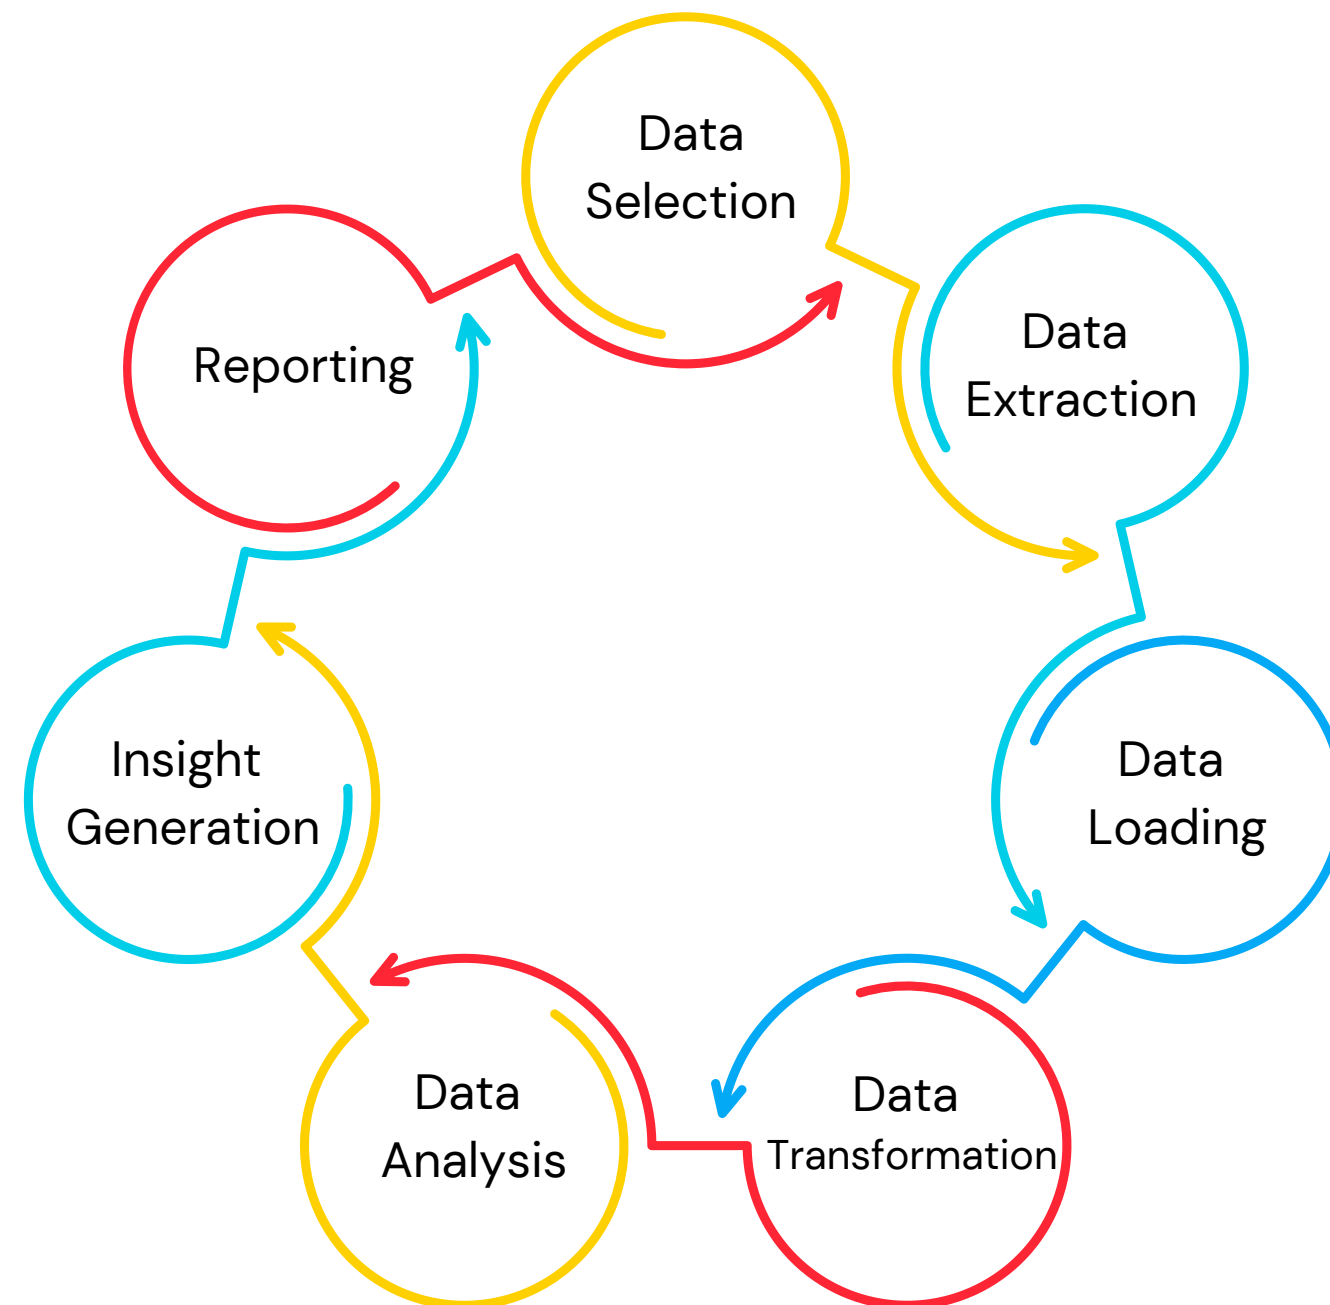

- 1 Explore guest behavior, booking trends, and revenue management through **15** key questions.
- 2 Uncover actionable insights for hotel management to refine their strategies, improve customer satisfaction, and maximize revenue.
- 3 Provide a snapshot of the hotel's performance, highlighting areas of strength and opportunities for growth.
- 4 Serve as a foundation for data-informed decision-making in the pursuit of excellence in hospitality.

Dataset Overview

- **Booking_ID**: Unique identifier for each reservation
- **no_of_adults** and **no_of_children**: Number of adults and children in each reservation
- **no_of_weekend_nights** and **no_of_week_nights**: Number of weekend and weekday nights in each reservation
- **type_of_meal_plan**: Meal plan chosen by guests (e.g., breakfast, half-board, full-board)
- **room_type_reserved**: Type of room reserved (e.g., single, double, suite)
- **lead_time**: Number of days between booking and arrival
- **arrival_date**: Date of arrival
- **market_segment_type**: Market segment (e.g., corporate, leisure, group)
- **avg_price_per_room**: Average price per room in each reservation
- **booking_status**: Status of the booking (e.g., confirmed, cancelled, pending)
